Quantro ERP

A simple, powerful and professional cloud ERP for modern trading businesses.

Quantro ERP brings sales, purchasing, inventory, finance and HR into one centralized, cloud-based platform — giving growing trading businesses clearer visibility and better control over everyday operations.

About the product

About Quantro ERP

Quantro ERP is a cloud-based, subscription-driven ERP solution designed to simplify and organize everyday business operations. It brings essential business functions together in one centralized platform, helping companies manage sales, purchasing, inventory, finance, HR and related processes with greater visibility and control.

Built around practical, connected workflows, the system is designed for trading and distribution businesses that need dependable document control, clear reporting and easy-to-use processes — without unnecessary complexity.

Cloud-based access

Work from anywhere without depending on a single office computer.

Centralized management

Sales, purchasing, inventory, finance and HR in one platform.

Cross-platform access

Works on PC, laptop, MacBook and Windows through Chrome, Safari or Edge.

Document control

Connected business documents, organized and easy to trace.

Built for everyday operations

- ✓ Improved operational control
- ✓ Simple, guided workflows
- ✓ Better business visibility
- ✓ Professional document management
- ✓ Designed for trading businesses
- ✓ Easy-to-use processes

Clear visibility, at every level

From daily transactions to management reporting, Quantro ERP keeps business information organized, connected and easy to review.

Connected Platform

Product benefits

Why Quantro ERP?

Practical, everyday business benefits — built around how trading businesses actually operate.

**Centralized business control**

Manage important business activities from one centralized ERP platform.

**Complete document control**

Connected documents from enquiry and quotation through order, delivery and invoicing.

**Professional & accurate processing**

Structured workflows help teams follow consistent processes and reduce manual mistakes.

**Local support**

Customers in Oman receive local support through the Quantro ERP support channel.

**Cloud-based access**

Access the system through the internet, without depending on a single office computer.

**Cross-platform support**

Works on PC, laptop, MacBook and Windows with Chrome, Safari or Edge.

**Better visibility**

A clearer view of sales, purchases, inventory, receivables, payables and financials.

**Simple to use**

Built around practical business workflows rather than unnecessary complexity.

**Business document traceability**

Documents connect through the business process, making transactions easy to follow.

**Scalable business platform**

A structured foundation that supports business growth and evolving needs.

Every benefit above is delivered from one connected platform — not a collection of disconnected tools.

Evolves With You

Full Custom ERP Development

Bespoke

For companies wanting a fully dedicated system, the Quantro ERP team can design and build a complete custom ERP from scratch — around that company's own processes and requirements.

Built From Scratch

Owned by Your Company

Dedicated Dev Team

Powerful Where It Matters, Simple Where It Should Be

Overly basic

Overly complex

Focused on the practical, everyday functions trading businesses rely on — structured enough for control, simple enough for daily use.

Local Support

For customers in Oman, Quantro ERP is supported through the local distribution and support network — a local point of contact for implementation assistance, user support and guidance.

Role-based value

What Each Team Gains

Every role sees the information that matters to them, from one connected system.

Management

- Business overview
- Reports
- Financial visibility
- Sales & purchase monitoring

Sales

- Customer records
- Quotations
- Orders
- Deliveries
- Invoices

Purchase

- Supplier management
- Purchase orders
- Receiving
- Costing

Inventory

- Stock visibility
- Stock movement
- Stock tracking

Finance

- Receivables
- Payables
- Expenses
- Tax
- Profit & Loss
- Cash position

HR

- Employee records
- Attendance
- Leave
- Payroll

Because every module shares the same underlying data, no team works from an outdated or disconnected copy of the truth.
